

VILLE KALLINEN

BACHELOR OF SCIENCE IN
TECHNICAL PHYSICS AND
PHARMACIST

ABOUT ME

I am a licensed pharmacist with several years of experience in the healthcare sector. My long-standing interest in the natural sciences, particularly physics, inspired me to pursue a new career path in engineering. I have completed a Bachelor's degree in Physics and am expected to graduate with a Master of Science in Engineering Physics, specializing in Computational Engineering, during the autumn semester of 2026.

I am now seeking opportunities to apply my analytical, technical, and problem-solving skills in the field of physics and engineering. I am particularly interested in computational methods, signal processing, machine learning, and the development of innovative technological solutions.
